8th	Study Skills	
8th	STEM: Semester 1: Medical Detectives	

SCHEDULING TIPS AND TRICKS!

- When selecting electives, try to select electives in the same period for both semesters. For example, you selected 2nd period Art first semester, so you will want to choose an elective that is held during 2nd period for second semester.
- **Think about the future.** Do you want to take Yearbook as an 8th grade student? You should probably think about taking Canva Basics at some point before then. Do you want to compete in Robotics in BETA? Maybe STEM is a great elective option for you!
- Choose classes based on your interests, not based on which classes your friends are taking. Classes are a lot more interesting if YOU are interested in them.
- We will be doing our official scheduling during a guidance lesson in the Spring semester. This paper is just a guide to help you prepare for that lesson.
